MATURATION

2. TIME USED BARRELS

Hohen-Sülzen lies in the Eisbach Valley, which as its name suggests features a cold highlands brook flowing down from the Donnersberg massif. This topography has a significant influence that is most pronounced on cooler evenings. The temperature fluctuations between day and night are greater in Hohen-Sülzen than in our other districts. Wines grown here maintain an incredible freshness, elegance and pleasant acidity despite the high ripeness levels in the fruit.

During aging and care in the cellar, we give this wine the necessary time (about 18 months) to reach the ideal maturity in the French tonneaux.

The bouquet of this Pinot Noir, whose grapes ripen in our best plots, around the Kirchenstück, reminds of dark fruits and the discreet wood of the barrels, which are made of the best French oak, underlines the fine elegant nature. In the mouth, the fine spicy nature is complemented by an enormous minerality, while the fine, cool nature supports the drinking flow.

The VDP classifies the vineyards of its members, with the finest divided into "Grosse Lagen" and "Erste Lagen" sites.

Starting with the 2018 vintage, our Hohen-Sülzen Spätburgunder will bear the VDP. AUS ERSTEN LAGEN classification, as only grapes from classified Erste and Große Lagen sites can be used in this wine.
